

# Lambretta

# Lambretta

Lambrate, the fashionable district ("quartiere"), is located within Zone 3, the administrative division of Milan, 6 km north-east of the city centre. The district is well known for Parco Lambro, a large urban park established in 1934.

The River Lambo rises from the Monte San Primo, elevation 1,685 metres (5,528 ft.), near the famous Madonna Ghisallo hill, not far from Lake Como. The Lambro passes through Brianza then reaching Monza before crossing its famous park (where king Umberto I was assassinated by Gaetano Bresci) in two branches which join again before the river passes through the eastern part of Milan. The Lambro finally flows into the River Po near Orio Litta.

The Lambro is derived from Lambrus, which corresponds to Greek ελαφρός, meaning 'light (in weight), quick, nimble' and is related to Illyrian lembus 'light vehicle' whence also Greek λέμβος. Lambretta riders are commonly referred to as Lambrettista (singular) or Lambrettisti (plural).

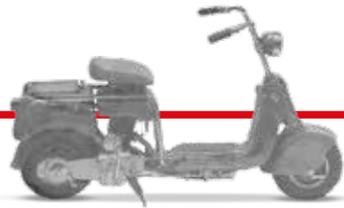

Ferdinando Innocenti

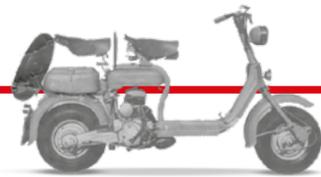

**1948**

**LAMBRETТА M (A) 125**  
The Model M also known as Model A was the first Lambretta to leave the production line at the Innocenti factory.

**1951**

**LAMBRETТА M MK D**  
This was the first Model that was made outside of Italy as Innocenti started to sell the license for production around the world.

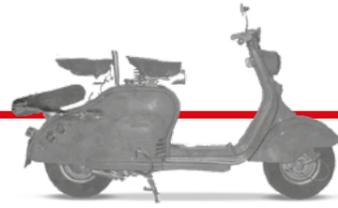

**1969**

**LAMBRETТА GRAND PRIX DL**  
Innocenti brought in the design house Bertoni to completely re-design the GP range. This model was only known as the GP in the UK and a few other markets, in all others it was known as the DL.

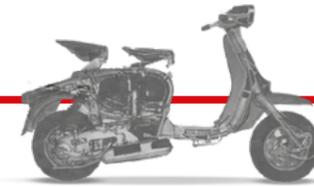

**1950**

**LAMBRETТА LC 125**  
This was the first Lambretta to feature full sized leg shields and side panels. On this and the LD, the L stood for Luxury due to this special panel work.

**1961**

**LAMBRETТА SERIES 3 (LI)**  
The Series three and all subsequent models were nick named the "slim style". This is because compared to the series I and II, the Lambretta had become slimmer and sleeker. The slim style covers all models, LI, TV, SX, GP.

**2017**

**LAMBRETТА V-SPECIAL**  
The V-Special is equipped with a 50cc, 125cc and 169cc air cooled engine. The 125cc is also produced with a water cooled engine.

## Metal craftsmanship

---

Lambretta introduces the double layer side panel. The base is an ingenious 1.2 mm steel middle beam that stretches to the sides in an airplane profile architecture. This construction not only enables Lambretta owners to reach their engine easily, but also avoids unnecessary added weight. The sides are then covered with side panels that can be delivered in different shapes and colours. The standard V-Special is 'monocolore'. Lambretta has chosen to link up with fashionable hard colours of the current era like orange, turquoise and grey next to the more regular colours white, red and blue.

We are driven by passion,  
tradition and innovation.

# Fix Fender

With the introduction of the 175 TV in 1957 Innocenti introduced the fix fender that became the iconic character of all future Lambrettas.

  
**Chassis:** Matt grey  
**Seat:** Dark brown

  
**Chassis:** Orange  
**Seat:** Black

  
**Chassis:** Silver blue  
**Seat:** Dark brown

# Flex Fender

The V-Special is available in both Fix as well as Flex fender to appeal to the personal taste of its owner.

  
**Chassis:** Red  
**Seat:** Black

  
**Chassis:** Blue  
**Seat:** Dark brown

  
**Chassis:** White  
**Seat:** Red

**Chassis:** Blue/White  
**Seat:** Black

  
**Chassis:** Red/White  
**Seat:** Black

## Details

Every detail of the V-Special is proof that it is a pure Lambretta: Head and rear lights show the Lambretta trademark while the key is decorated with the traditional Lambretta lion.

A large luggage area can be found under the comfortable seat. In regards to technology, the new V-Special is up-to-date. Front and rear disc brakes provide excellent braking performance.

# Carbon+

To further customize the 'lammy', Lambretta has prepared full carbon sets for the aftermarket that will convert the machine into a real old school Lambretta 'bicolore'.
